COMPANY THAT SEARCHES
THE WORLD, NOT JUST TO
SELL OR TO SOURCE, BUT TO
FIND INTELLECTUAL
CAPITAL - THE WORLD'S BEST
TALENTS AND GREATEST
IDEAS. - Jack Welch**

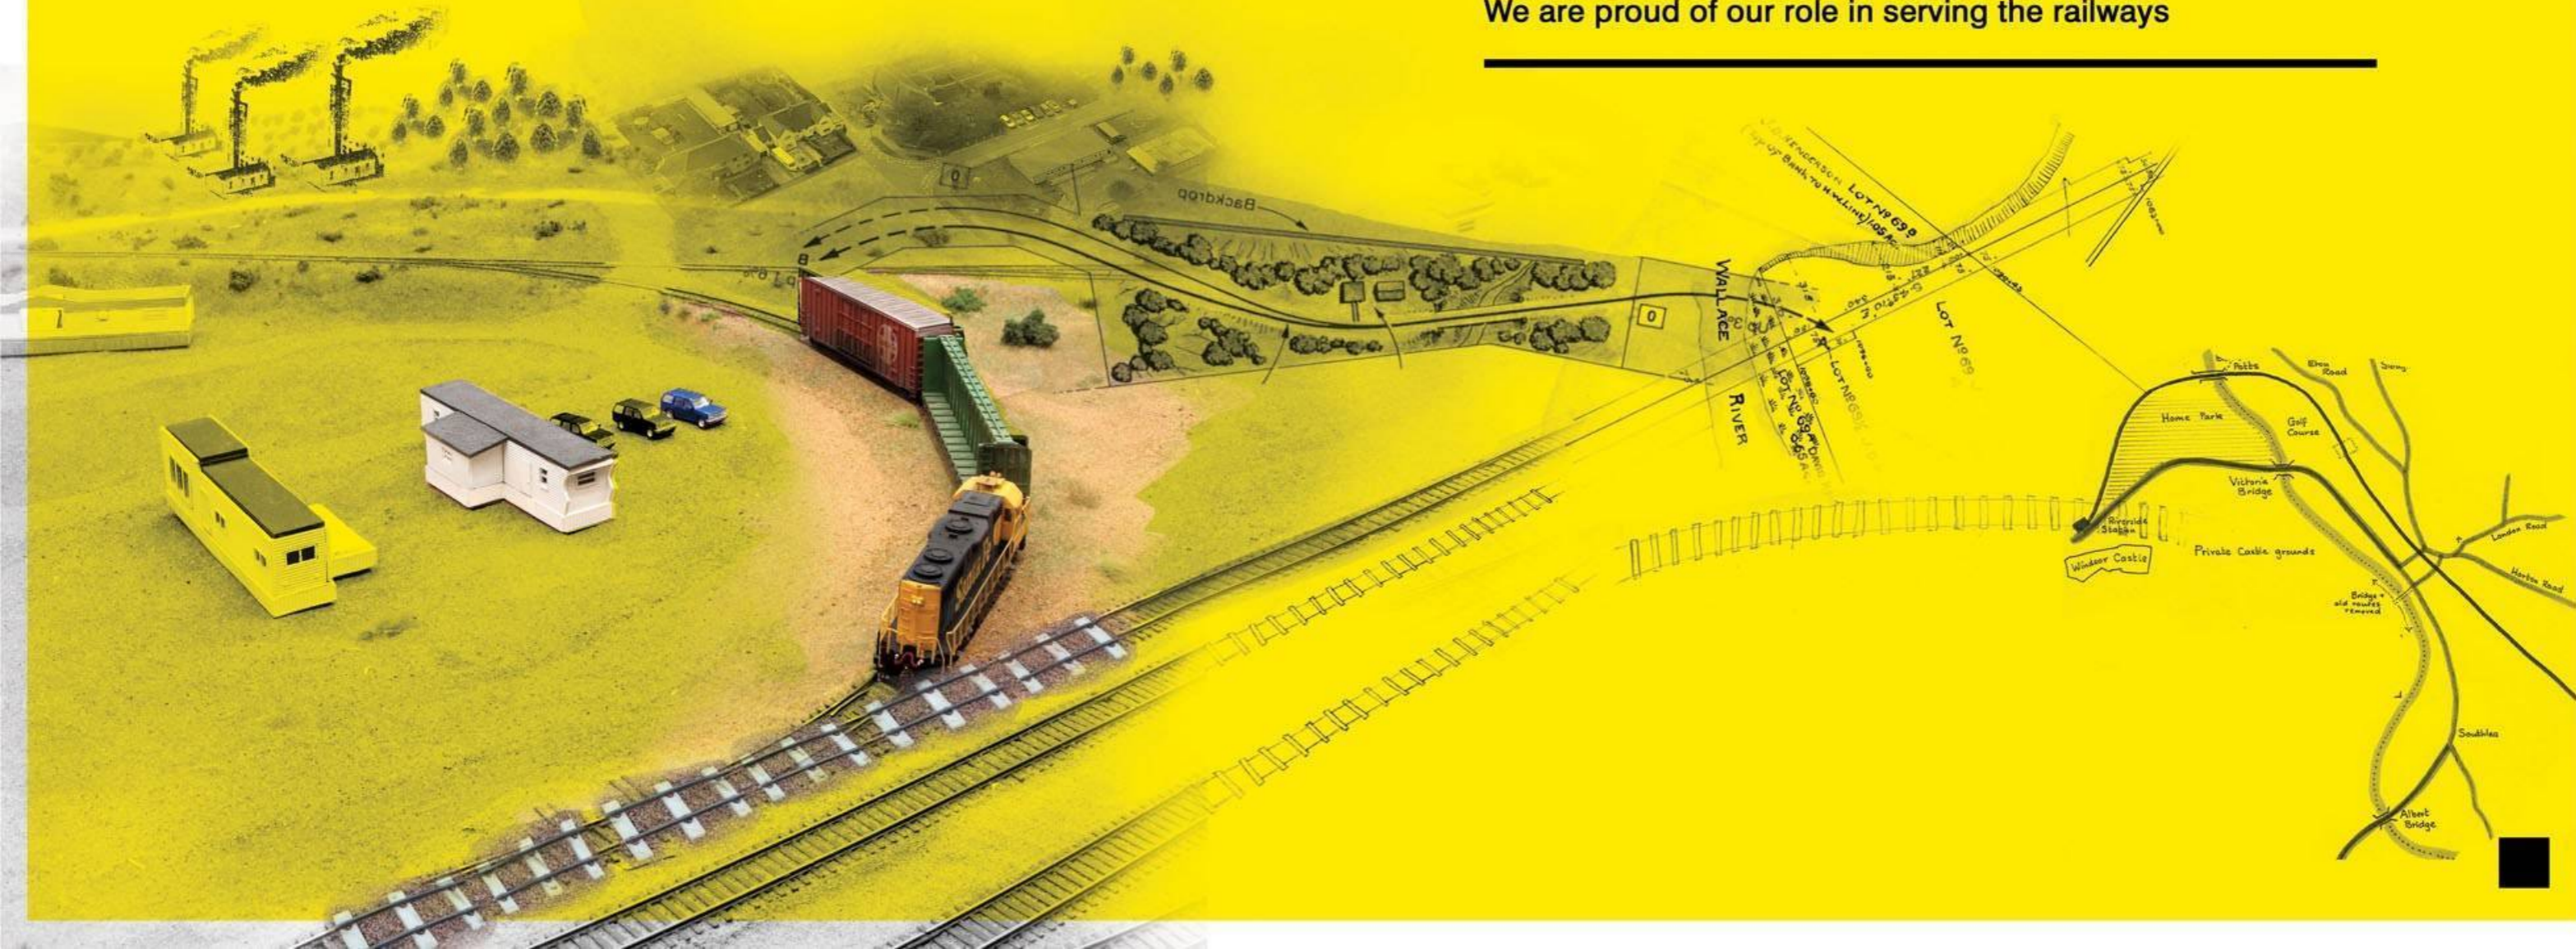

Growth on Strong Tracks

The Tracks

The tryst of man and rail began almost five hundred years ago with horse drawn carriages and rails of wood or stone. In 1820, the modern railway system first appeared in England with the steam locomotive or 'iron horse'. India embraced the railways a few decades later and today it is recognized as essential for swift and efficient movement of goods and labour. It is indeed an integral part of economic growth.

Over the years trains have gone faster and rail journeys have become safer. For both speed and safety the quality of tracks has been a critical component. PCM Strescon Overseas Ventures Limited is the leading manufacturer of concrete sleepers and fasteners that bind the tracks to the earth. It is also a pioneer in Flash Butt Welding across India.

We are proud of our role in serving the railways

We are
PCM Strescon Overseas
Ventures Limited

The Sights

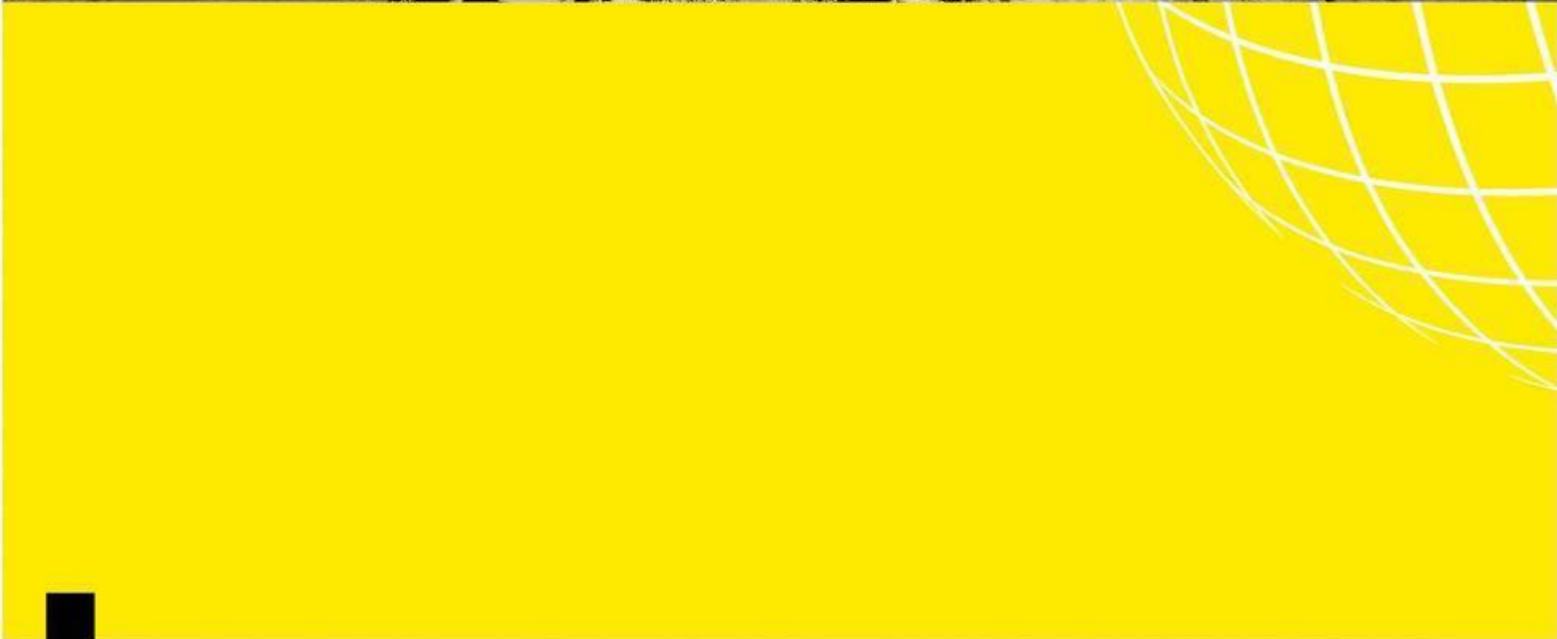

We have set our sights to achieving global leadership – venturing into new territories and expanding our scope of work. We have focused attention on staying ahead of the competition in terms of technology, time and quality. We have anticipated industry trends to develop a better future for all the stakeholders.

The Mission

To march ahead globally with consistent dedication to provide quality construction, technical and management services to customers.

To provide a congenial environment for attracting the best professionals and encouraging them to perform at their best.

The Power & Span

FOR THE RAILWAYS WE ARE LEADERS IN THE MANUFACTURING OF RAILWAY SLEEPERS, TRACK FASTENERS AND PIONEERS IN FLASH BUTT WELDING.

OUR GROUP INTERESTS ALSO SPAN INFORMATION AND COMMUNICATION, MANUFACTURING, SERVICES, ENERGY AND CONSUMER PRODUCTS.

Based in Siliguri, North Bengal, India, PCM Strescon Overseas Ventures Limited is part of the widely diversified PCM Group, which has interests in sectors such as Information and Communication, Manufacturing, Services, Energy and Consumer Products. This includes high speed Internet and Cable TV services, Tea Gardens in the Dooars region of North Bengal, CTC Tea processing and Power Projects.

A fast expanding dynamic Group, we also have offices in Kolkata, New Delhi and Riyadh, Saudi Arabia.

The Record

PCM Strescon Overseas Ventures has supplied more than 4 million Mainline Concrete Sleepers to Indian Railways till date. Its three plants manufacture various types of Sleepers of different gauges, Bridge Slabs etc. for the Indian Railways.

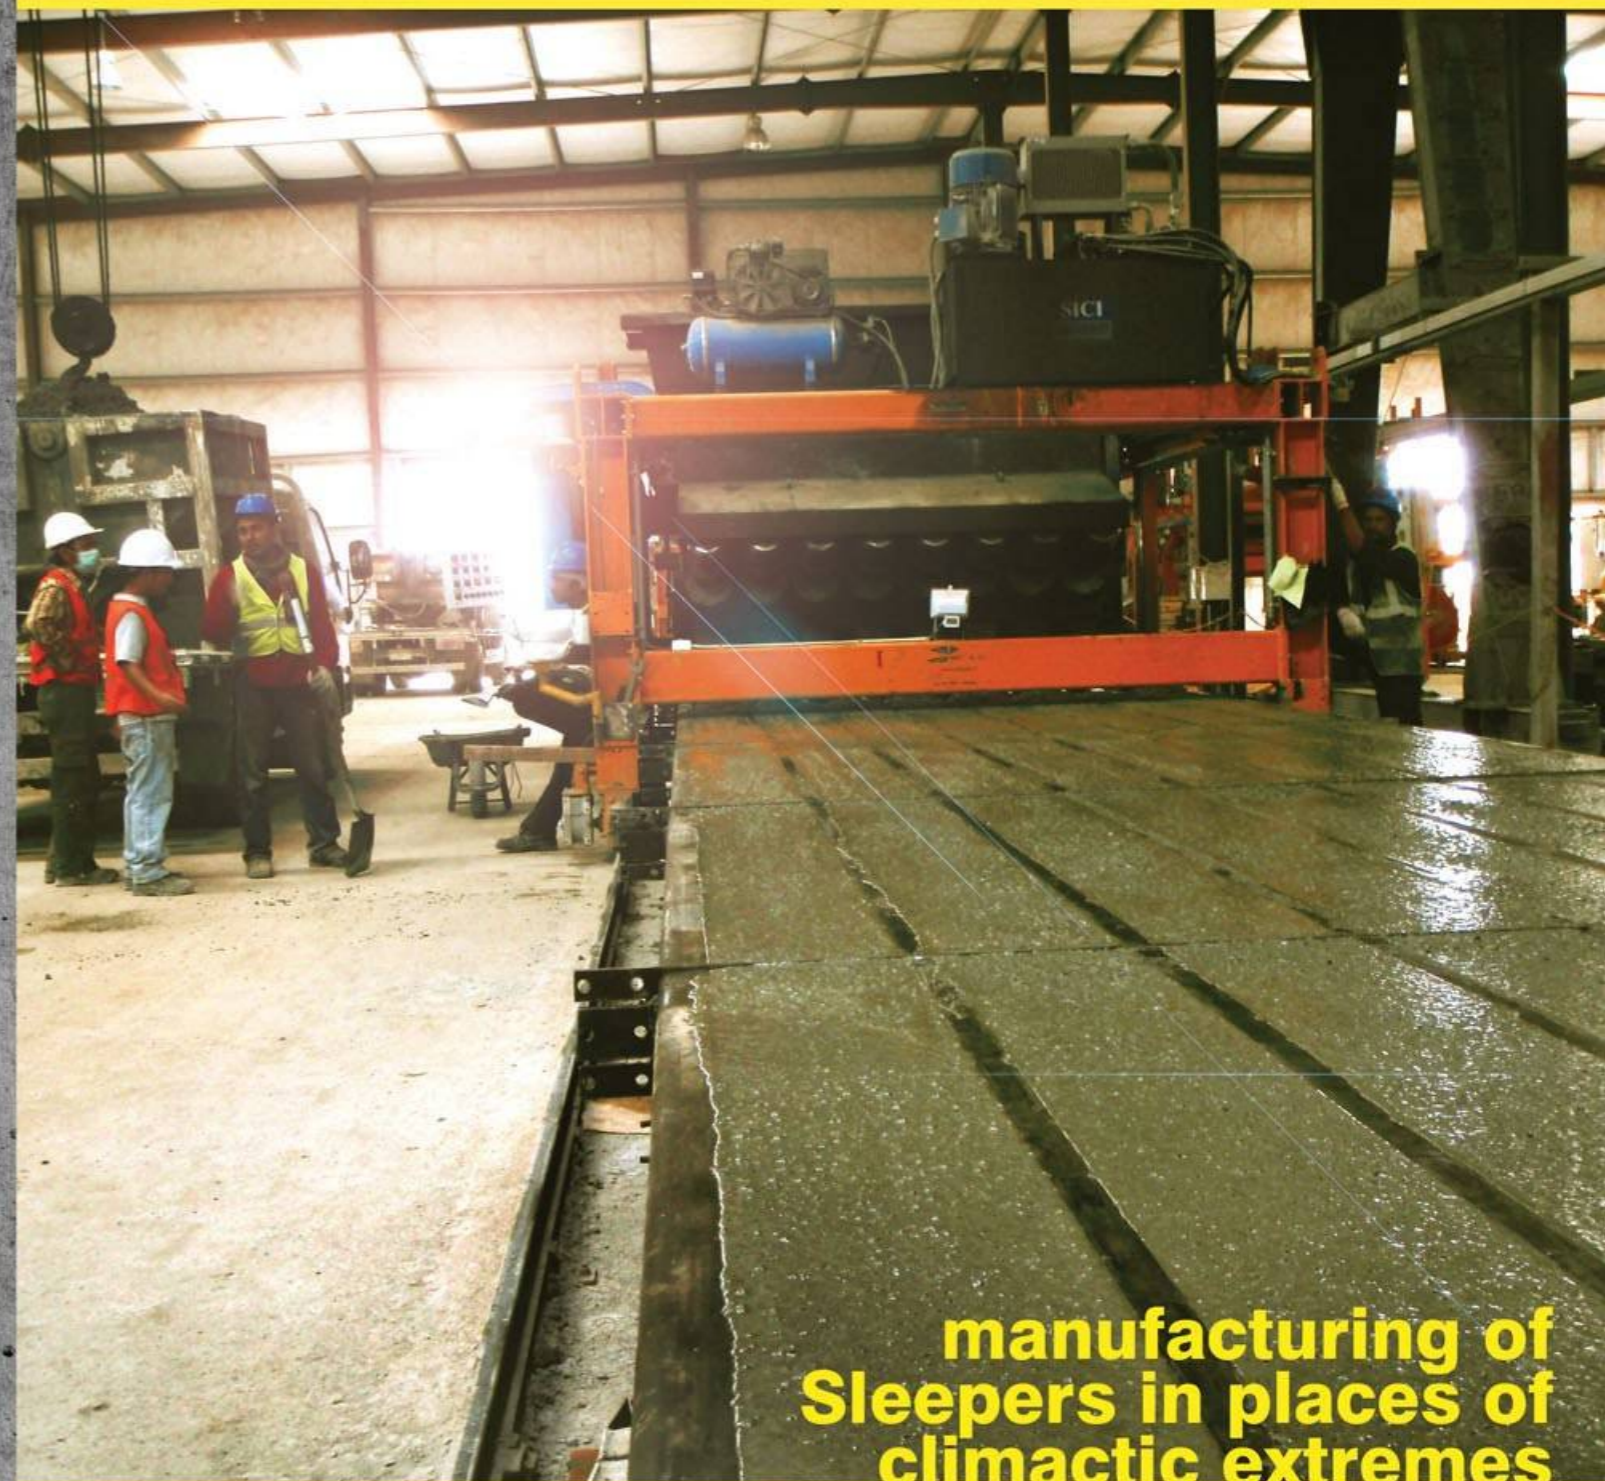

Outside India, the Company has Bangladesh Railways in the prestigious JAMUNA Bridge Rail Link Project, a project supported by Asian Development Bank (ADB). We have also successfully supplied about 2.6 Mio PSC Heavy Haul Sleepers of 32.5 T Axle Load for Saudi Arabian Railways (SAR).

our state-of-the-art greenfield long line plants have achieved the **HIGHEST LEVEL OF QUALITY AS PER AREMA STANDARDS WITH THE HIGHEST PRODUCTION LEVELS WORLDWIDE.**

The Flash Butt Welding Division undertakes welding of rails using the latest on spot flash butt welding as per the stringent International norms. Our Mobile Flash Butt Plants with Rail Cum Road Vehicle can carry out depot welding or on site welding as required. We have successfully executed welding of rail panel of various sizes at different locations with three tier/four tier arrangements.

The Expertise

The manufacture and installation of sleepers for locations with climactic extremes is a complex and challenging task. PCM Strescon has excelled in this field, employing the best of engineers and technicians to devise innovative solutions for adverse conditions. The expertise combined with advanced project management skills, offers the fail-safe reliability to our international and domestic clients.

The Future

An aerial photograph of a long freight train stretching across a vast, arid desert landscape under a clear blue sky. The train is composed of numerous dark-colored freight cars, with a white locomotive at the front. In the foreground, a 3D model of a railway track section is overlaid on the image, showing concrete sleepers and rails. The model is white and extends from the bottom left towards the center of the image.

While concrete sleepers, fasteners and track welding are our traditional strength, PCM Strescon is all set to explore allied fields, providing customized solutions for railway track infrastructure. A beginning has already been made in the Middle East and South East Asian countries. The growing capabilities affirm the future prospects of the Company.
